Lock-on fittings simplify maintenance operation.

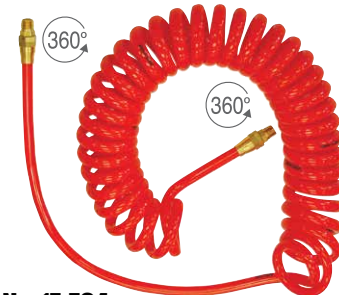

No need to use cutting and no crimping with virole required.

FLEXCOIL POLYURETHANE SELF-STORING HOSE

- Offer little resistance to pull and automatically retract
- High abrasion and moisture absorption resistance
- Heavy-duty brass fittings

SAFETY LOCKOUT EXHAUST BALL VALVE

FULL FLOW

- Exhausts automatically and continuously downstream air pressure as soon as turned in the closed position
- Vinyl coated steel handle, offering both thermal and electrical protection

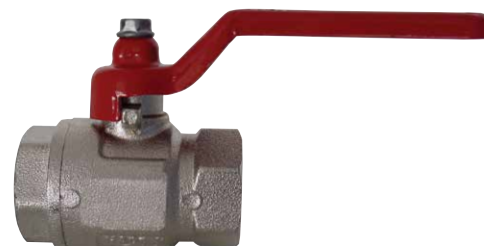

Ideal to isolate a section of the compressed air system from the compressor, for maintenance repairs or to change components.

NICKEL PLATED BRASS BALL VALVE

FULL FLOW

- Industrial quality two-piece forged brass
- Precision machining for maximum strength, durability and maintenance-free operation
- Corrosion resistant

If the tip of the nozzle is blocked, the airflow escapes through the holes around the nozzle and the static pressure remains under 30 PSI

WITH QUIET NOZZLE

- Reduces noise up to 20 dB over conventional blow guns
- Energy efficient

No 60.387
8 mm x 13 cm tube
~~\$44.80~~ **\$31.36**

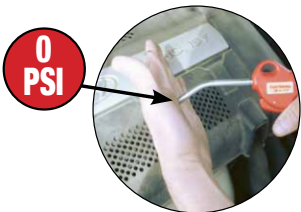

AIRPRO MAXIMUM SAFETY BLOW GUN

- The safest blow gun available on the market
- Powerful airflow

A UNIQUE CONCEPT

Exceeds OSHA and other Health and Safety Agencies' standards! because if the tip of the blow gun is blocked, a safety check valve located inside the blow gun mechanism **shuts off the airflow immediately.**
